

Derisk360

Data & AI

The First Industrial
Revolution: The Age of
Mechanical Production

The Second Industrial
Revolution: The Age of
Science and Mass Production

The Third Industrial
Revolution: The Digital
Revolution

The Fourth Industrial
Revolution: Democratisation
of Data Analytics and
Artificial Intelligence

Our approach

Data

Optimise

Train

Our mission is to deliver high impact and value by democratising data analytics and artificial intelligence (AI) that requires a whole new approach including strategy, organisation setup, technology, skills, and agile execution

Strategy

Derisk360 helps organisations to integrate big data analytics and AI to their corporate strategy

Impact and Value Assurance

Derisk360 services are designed and implemented by focussing on the impact delivery and success is tracked through a comprehensive set of KPIs

Data Ecosystem

Derisk360 helps to create a data strategy to enable the best-in-class data governance, data architecture, and ecosystem

Artificial Intelligence

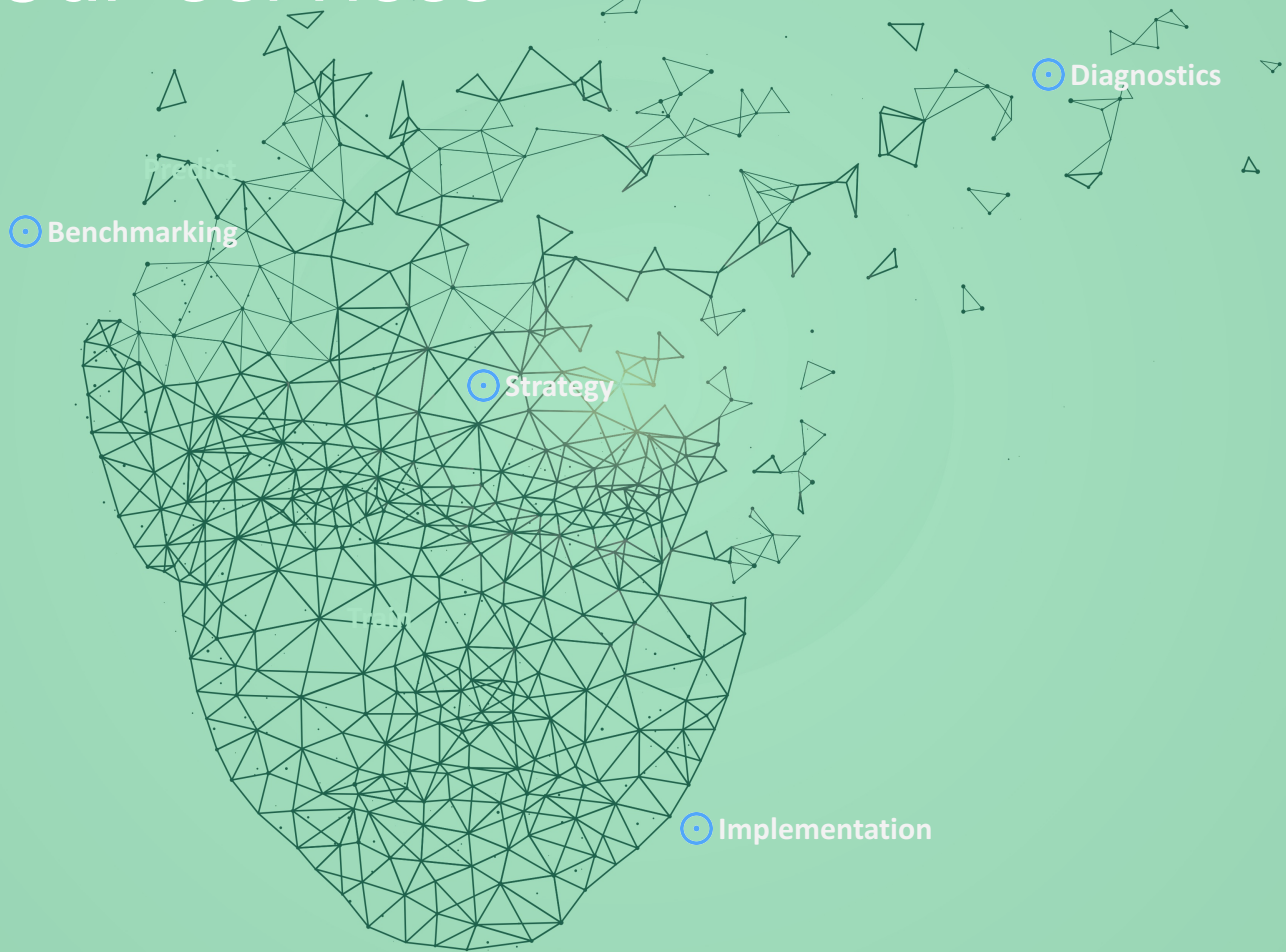

Derisk360 enables to deploy models using latest machine learning and AI techniques on a state-of-the-art setup and best practices

Culture

Derisk360 acts as a catalyst to change culture that fosters data-driven agile decision making, test and learning environment

Our services

Diagnostics

Our diagnostics covers a broad range of topics such as architecture, data readiness, hosting and infrastructure, analytics and AI ecosystem, legal, security, regulatory constraints etc before starting an engagement

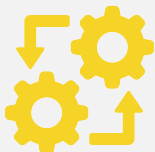

Benchmarking

Our method assess a company's strengths and gaps relative to best practice and delivers a single score to be benchmarked against peers and analytics leaders

Strategy

We help clients to create an enterprise-wide data analytics and AI vision and strategy that includes step-out opportunities tied to the group business strategy and underpinned by a quantified use case roadmap

Implementation

Our client-centric consultants who are data technologists at the core jointly problem-solve with the clients in a variety of roles such as data strategists, translators, data engineers, data scientists, developers etc

About us

Derisk360 is a data analytics and artificial intelligence startup based in London, UK. The company was founded by seasoned professionals who are data technologists at core with consulting experience in firms such as McKinsey, Deloitte, EY and startups.
